

Emacs

Magit - git manager

F4 = Git log

F5 = Commit

org-mode

<tab> = Fold away tasks

M-shift-<enter> = Add TODO item

Nested items with check boxes

C-c a = agenda menu

t = show all todo items

s = search all org-mode files

C-c C-s = Schedule todo item

C-c C-a = attach a file to task (eg:map.pdf)

O = open attachment in emacs

org-mode cont...

Table mode

```
|1  |2  |= $\$1+\$2$ |  
|564|345| =      |
```

Links

```
[[Test]] = Links to 'Test' heading
```

Keep track of your hours

```
C-c C-x C-i      = Start clock
```

```
C-c C-x C-o      = Stop clock
```

Rinari

C-c ' q = SQL
C-x C-z = Rails Console
C-x f = Find file within project
C-x g = Grep within project

undo-tree

F10 = visualize the undo tree.

snippets

```
hm      = has_many .....
```

```
hmt     = has_many ..... :through .....
```

Spell checker

Org-mode

Text files

Comments + strings in code

M-x ispell = Run spell checker

a = accept/ignore

i = insert into dictionary

0-9 = use suggestions at the top

Autocomplete

Drop down menu

EG in ruby: `"test".<wait>`

Works for most programming languages

gist - Post a gist to github

F2 = Enter description & github user

Bongo - Music player

M-x bongo = Start bongo
i = To insert into the library
<return> = play the song.

With volume-el use 'v' to change the volume

<https://github.com/dbrock/volume-el>

rcirc - IRC client

C-c I = IRC

You can add notification

<http://www.emacswiki.org/emacs/rcircNotify>

Twittering-mode

F1/M-x twit = Twitter

<http://www.emacswiki.org/emacs/TwitteringMode>

Timeout

M-x tetris
